

Geometry Notes TG - 3: Translations

Translations

A *translation* is a

In a *translation*, all points in the plane move

Properties of Translations:

1. For any two points P and Q and their images P' and Q' ,
2. Distances are preserved.
3. Angle measures are preserved.

Translations with Coordinates

Ex: $\triangle ABC$ has vertices at $A(5, 0)$, $B(2, 4)$ and $C(-1, 2)$. Draw $\triangle A'B'C'$, the image of $\triangle ABC$ under the transformation $T_{\overline{PQ}}$ translation.

$$A(5, 0) \rightarrow A'$$

$$B(2, 4) \rightarrow B'$$

$$C(-1, 2) \rightarrow C'$$

Ex: $T_{-5,2}(4,1)$

Ex: Consider the transformation $T_{\overline{TJ}}$.

a. What does $T_{\overline{TJ}}$ mean?

b. Find the image of W .

c. Find the image of \overline{KS} .

d. Find the *preimage* of \overline{HI} .

e. What is an alternate symbolic notation for this translation?

A	B	C	D	E	F
G	H	I	J	K	L
M	N	P	Q	S	T
U	V	W	X	Y	Z

Ex: On the same chart above, find

a. $R_J(C) =$

b. $r_{\overline{CW}}(M) =$

c. $R_{Q,90^\circ}(D) =$

Geometry HW: Transformations – 3 Translations

1. Find the image of the point $(3, 5)$ under the translation $(x, y) \rightarrow (x + 2, y - 4)$.
2. Find the image of $(1, -3)$ under the translation $T_{2, -1}$.
3. Find the rule for the translation under which the image of $A(3, 8)$ is $A'(5, 5)$.
4. Under a given translation, the image of $(4, 2)$ is $(6, -1)$.
 - a. Find the image of $(-2, 5)$ under the same translation.
 - b. Find the *preimage* of $(3, -4)$ under the same translation.

5. In the diagram at right, $\triangle ABC$ has vertices $A(-2, 2)$, $B(0, 5)$ and $C(3, 1)$. Vector \overline{PQ} has initial point $P(-1, -1)$ and terminal point $Q(2, -3)$. State the coordinates of the vertices of $\triangle A'B'C'$, the image of $\triangle ABC$ after the transformation $T_{\overline{PQ}}$.

6. Under the translation $P(x, y) \rightarrow P'(x + 4, y + 3)$,
 - a. What is the distance between any point P and its image P' ?
 - b. What is the slope of the line PP' ?

7. In the diagram at right, the image of A under a certain translation is L . Under the same translation,
 - a. what is the image of H ?
 - b. what is the image of \overline{LO} ?
 - c. what is the *preimage* of M ?

8. a. **On graph paper**, graph $\triangle ICE$ having vertices $I(-3, 1)$, $C(-1, 0)$, and $E(-1, 4)$
- b. Graph $\triangle I'C'E'$, the image of $\triangle ICE$ under a line reflection in the y -axis.
- c. Graph $\triangle I''C''E''$, the image of $\triangle I'C'E'$ after a line reflection in the line $x = 3$.
- d. Name the single transformation that is equivalent to $r_{y\text{-axis}}$ followed by $r_{x=3}$.
9. a. Find the coordinates of P' , the image of $P(x, y)$ after a translation $T_{a,b}$.
- b. Find the slope of $\overline{PP'}$.
- c. Find the length of $\overline{PP'}$.
